

AADARSH JHA

Tech Lead · Web Developer · Cybersecurity Enthusiast

+91 9122998294 • jhaadarsh2003@gmail.com • Bengaluru, Karnataka • github.com/sudo-aadarsh

Summary

Second-year Computer Science & Engineering student at BMS Institute of Technology (Visvesvaraya Technological University, VTU), CGPA 8.02. Tech Lead at Earthling Aid Tech, Bengaluru, with hands-on experience in web development, Agentic AI, and cybersecurity. Recognized Resource Person at Sai Vidya Institute of Technology for a 3-day Agentic AI workshop. National-level hackathon participant including ArtPark Codeforge at the Indian Institute of Science (IISc), Bengaluru. Seeking internships in software development, web engineering, or cybersecurity.

Experience

Earthling Aid Tech

Tech Lead

Bengaluru, Karnataka

Jan 2025 – Present

- Architected and led full technical development strategy, engineering workflows, and team execution for a social-impact tech startup.
- Delivered 3-day Agentic AI Skill Development Program at Sai Vidya Institute of Technology (Visvesvaraya Technological University / National Assessment and Accreditation Council — A Grade) for 50+ CSE students (Feb 9–11, 2026); received Letter of Appreciation from Principal Dr. Manjunath T N.

Education

BMS Institute of Technology — Visvesvaraya Technological University (VTU)

B.E. Computer Science & Engineering | CGPA: 8.02 | 2nd Year | Coursework: DSA, DBMS, OOP, OS, Cybersecurity

Bengaluru, Karnataka

Aug 2024 – Present

Mithila Institute of Technology

Class XII — PCM + Computer Science (National Examinations Board)

Janakpur, Nepal

2020 – 2022

Projects

Student Safety Web App | JavaScript, Node.js, HTML, CSS

[github/Student-safety-](https://github.com/Student-safety-)

- Built full-stack campus incident-reporting platform with real-time safety alerts; modular Node.js REST API backend designed for multi-campus deployment.

Internet Traffic Visualizer | JavaScript, Web APIs

[github/internet-traffic-visualizer](https://github.com/internet-traffic-visualizer)

- Engineered real-time web app mapping live data-packet routing and network topology — adopted as a learning tool for networking concepts.

DineView | JavaScript, Agentic AI

[github/DineView](https://github.com/DineView)

- Restaurant-discovery platform with Agentic AI-powered personalized recommendations and responsive component-driven UI.

code_DNA | Python, Genetic Algorithms

[github/code_DNA](https://github.com/code_DNA)

- Evolutionary system where programs self-generate and mutate via genetic algorithms; validated multi-generation code evolution pipeline.

Technical Skills

Languages: Python, JavaScript, C, C++, HTML5, CSS3, SQL, Bash

Technologies: Node.js, React, Git, GitHub, Linux, MATLAB, REST APIs

Domains: Cybersecurity & Ethical Hacking, Operating Systems, Network Security, Web Development, Algorithms

Certifications

Cisco — Networking Fundamentals (2024)

Cisco — Ethical Hacker Certificate (2024)

Microsoft — Cybersecurity Analyst Certification (2024)

Infosys Springboard — Python Programming | C Programming | Cybersecurity Fundamentals (2024)

MATLAB — Statistics & Data Analysis | Curve Fitting Toolbox (2025)

Microsoft / European Commission — EU AI Skills Passport (2026)

Hackathons & Achievements

- ArtPark Codeforge Hackathon — Indian Institute of Science (IISc), Bengaluru (National Level, 2024–25): Developed AI-driven solution evaluated by IISc research faculty and industry experts.
- Anveshana Hackathon — National Level (2024–25): Designed and provided working prototype within 24 hours; evaluated by industry judges.
- CodeRed Hackathon (Jan 2026): Competed in rapid engineering challenge and presented functional solution within contest constraints.
